

AEROTEMP ENGINEERING SDN BHD

HOT AIR HEATER

Hbt Air Heater use ceramic material that can resist high temperature until 1650°C. The hot air heater is intended for use within metal sheaths to heat liquids and gases. They are highly known for use in equipment that requires element replacement without the need for system drainage.

Product Information:

- Power Rating: 435W~ 21KW
- Voltage: 120Vac ~ 480 Vac

Different size, voltage and power are available via customization.

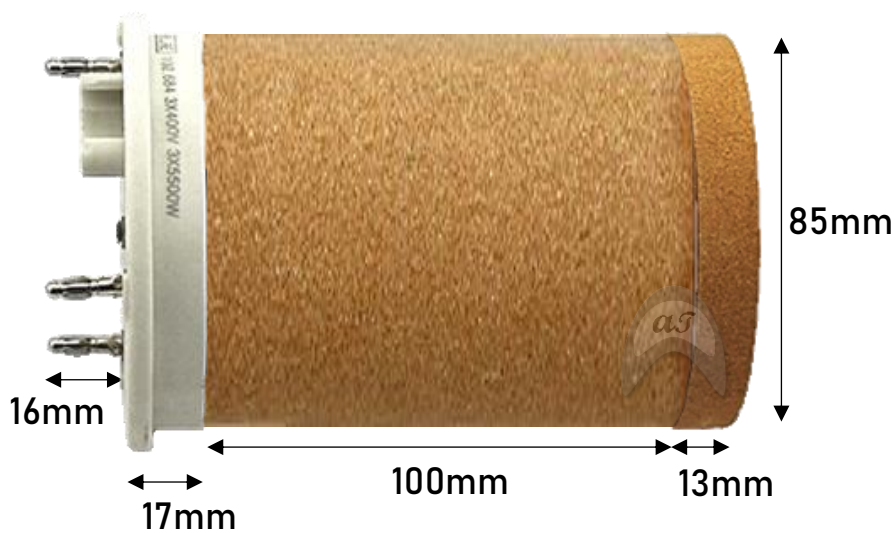

Product Application:

- Hbt air gun

Standard Stock for Hot Air Heater

Type	Rated Power	Rated Voltage
100.689	230V	1550W

Type	Rated Power	Rated Voltage
102.684	3*400V	3*5500W
